# ART HISTORY: Flexibly Organized & Summarized

This is a note-taking worksheet that teaches students how to organize and summarize information about art historical movements, time periods, and cultures. It has spots for dates, location, title, style/conventions, media/art forms, context, themes/ideas, and an area to sketch.

# How to Use These Worksheets

- When I taught college Art History, I printed a booklet at the beginning of each semester with all of the topics I would cover with students. I taught them **how to take notes and organize information** into these categories. Students turned in booklets for extra credit on a final exam.
  - Give students a blank notes page and ask them to **research** - individually or in a group - a particular culture. They can take notes on the page and turn it in, or share with others.
- After a lesson on a particular subject, have students work in groups to fill this out **based on what they learned in the lesson**.
- Have students fill out one page after a **homework** reading assignment about an art history topic.
  - **Use as a planning document** for a research paper.
  - **Use as a quiz, self-check, or test** to assess students' understanding about the topic.
